Chapter 4

o-way Slabs	4-1
4.1 Overview	4-1
4.2 Determining the Slab Thickness	4-1
4.3 Detailing Requirements and Guidelines for Flexural Reinforcement	4-2
4.3.1 Overview	4-2
4.3.2 Concrete Cover	4-2
4.3.3 Minimum and Maximum Bar Spacing	4-2
4.3.4 Corner Reinforcement	4-2
4.3.5 Development of Longitudinal Reinforcement, Flexural Cutoff Points, and Splices	4-3
4.3.6 Guidelines for Detailing the Flexural Reinforcement	4-3
4.3.7 Openings in Slab Systems	4-4
4.4 Detailing Requirements and Guidelines for Shear Reinforcement	4-4
4.4.1 Overview	4-4
4.4.2 Single- or Multiple-leg Stirrups	4-5
4.4.3 Headed Shear Studs	4-5
4.5 Detailing Requirements and Guidelines for SDC C	4-6

Chapter 5

diliS	9- I
5.1 Overview	5-1
	5-1
5.2 Sizing the Cross-section	
5.2.1 Beam Depth	5-1
5.2.2 Beam Width	5-1
5.3 Detailing Requirements and Guidelines for Flexural Reinforcement	5-2
5.3.1 Overview	5-2
5.3.2 Concrete Cover	5-2
5.3.3 Distribution of Flexural Reinforcement for Crack Control	5-2
5.3.4 Minimum Spacing of Flexural Reinforcement	5-3
5.3.5 Development of Longitudinal Reinforcement, Flexural Cutoff Points, and Splices	5-4
5.4 Detailing Requirements and Guidelines for Shear Reinforcement	5-5
5.4.1 Overview	5-5
5.4.2 Stirrup Configurations	5-5
5.4.3 Development of Shear Reinforcement	5-7

Contents

5.5 Detailing Requirements and Guidelines

for Torsional Reinforcement

5-8

5.5.1 Overview	5-8
5.5.2 Detailing Requirements and Guideline for the Transverse Reinforcement	es 5-9
5.5.3 Detailing Requirements and Guideline for the Longitudinal Reinforcement	es 5-9
5.5.4 Detailing Requirements and Guideline for Combined Effects	es 5-9
5.6 Steps in Beams	5-10
5.6.1 Overview	5-10
5.6.2 Top Steps	5-10
5.6.3 Bottom Steps	5-11
5.6.4 Deep Steps	5-11
5.7 Detailing Requirements and Guidelines for SDC C	5-11
5.7.1 Overview	5-11
5.7.2 Design for Flexure	5-11
5.7.3 Design for Shear	5-12
5.8 Detailing Requirements and Guidelines for SDC D, E, or F	5-13
5.8.1 Overview	5-13
5.8.2 Dimensional Limits	5-13
5.8.3 Design for Flexure	5-13
5.8.4 Design for Shear	5-13
5.9 Beams Not Designated as Part of the SFRS	5-14
Chapter 6	
Columns	6-1
6.1 Overview	6-1
6.2 Preliminary Column Sizing	6-1
6.3 Detailing Requirements and Guidelines for Longitudinal Reinforcement	6-2
6.3.1 Overview	6-2
6.3.2 Minimum Number of Longitudinal Bar	s 6-2
6.3.3 Spacing of Longitudinal Bars	6-2
6.3.4 Splices	6-3
6.4 Detailing Requirements and Guidelines for Transverse Reinforcement	6-3
6.4.1 Overview	6-3
6.4.2 Spiral Reinforcement	6-3
6.4.3 Tie Reinforcement	6-4
6.5 Detailing Requirements and Guidelines for Dowels	6-7
6.6 Detailing Requirements and Guidelines for SDC C	6-8

6.6.1 Overview	6-8
6.6.2 Longitudinal Reinforcement Requiremen	nts 6-8
6.6.3 Transverse Reinforcement Requirements	s 6-8
6.7 Detailing Requirements and Guidelines for SDC D, E, or F	6-9
6.7.1 Overview	6-9
6.7.2 Dimensional Limits	6-9
6.7.3 Longitudinal Reinforcement Requiremen	ts 6-9
6.7.4 Transverse Reinforcement Requirements	6-9
6.8 Columns Not Designated as Part of the SFRS	6-11
Chapter 7	
Walls	7-1
7.1 Overview	7-1
7.2 Determination of Wall Thickness	7-1
7.3 Minimum Reinforcement	7-1
7.4 Detailing Requirements and Guidelines for Reinforcement	7-2
7.4.1 Overview	7-2
7.4.2 Concrete Cover	7-2
7.4.3 Spacing Requirements	7-2
7.4.4 Lateral Support of Longitudinal Reinforcement	7-2
7.4.5 Wall Openings	7-3
7.4.6 Wall Corners and Intersections	7-4
7.5 Detailing Requirements and Guidelines for SDC D, E, or F	7-7
7.5.1 Overview	7-7
7.5.2 Web Reinforcement Requirements	7-7
7.5.3 Boundary Elements	7-8

Chapter 8 **Diaphragms**

8.1 Overview	8-1
8.2 Determing the Diaphragm Thickness	8-1
8.3 Detailing Requirements and Guidelines for Reinforcement	8-1
8.4 Detailing Requirements and Guidelines for SDC D, E, or F	8-2
8.4.1 Overview	8-2
8.4.2 Minimum Thickness	8-2
8.4.3 Minimum Reinforcement	8-2

7-8

8-1

Chapter 9

Foundations	9-1
0.1.0	0.4
9.1 Overview	9-1
9.2 Spread Footings	9-1
9.2.1 Material Selection	9-1
9.2.2 Determining the Base Dimensions and Thickness	d 9-1
9.2.3 Detailing Requirements and Guidelines for Reinforcement	s 9-1
9.3 Mat Foundations	9-3
9.3.1 Overview	9-3
9.3.2 Determining the Mat Thickness	9-3
9.3.3 Detailing Requirements and Guideline for Reinforcement	s 9-3
9.4 Drilled Piers	9-4
9.4.1 Overview	9-4
9.4.2 Determining the Shaft Diameter	9-5
9.4.3 Determining the Bell Diameter	9-5
9.4.4 Detailing Requirements and Guideline for Reinforcement	s 9-5
9.5 Grade Beams	9-7
9.6 Detailing Requirements and Guidelines for SDC D, E, or F	9-9
9.6.1 Overview	9-9
9.6.2 Footings and Foundation Mats	9-9
9.6.3 Grade Beams	9-10
9.6.4 Piles, Piers, and Caissons	9-10
Chapter 10
