

# Contents

Foreword	ii		
Chapter 1			
<b>Introduction</b>	<b>1-1</b>		
1.1 Overview	1-1		
1.2 Definitions	1-1		
1.3 Scope	1-2		
1.4 Organization of this Publication	1-2		
Chapter 2			
<b>Materials</b>	<b>2-1</b>		
2.1 Overview	2-1		
2.2 Concrete	2-1		
2.3 Nonprestressed Reinforcement	2-1		
Chapter 3			
<b>Determining the Diaphragm Thickness</b>	<b>3-1</b>		
3.1 Overview	3-1		
3.2 Serviceability Requirements	3-1		
3.2.1 One-way Slabs	3-1		
3.2.2 Two-way Slabs	3-1		
3.3 In-plane Strength Requirements	3-2		
3.3.1 Overview	3-2		
3.3.2 Flexure	3-2		
3.3.3 Shear	3-2		
3.4 Out-of-plane Strength Requirements	3-4		
3.4.1 Flexure	3-4		
3.4.2 One-way Shear	3-4		
3.4.3 Two-way Shear	3-5		
3.5 Minimum Diaphragm Thickness for SDC A, B, and C	3-9		
3.6 Minimum Diaphragm Thickness for SDC D, E, and F	3-9		
Chapter 4			
<b>Diaphragm Design Forces</b>	<b>4-1</b>		
4.1 Overview	4-1		
4.2 In-plane Forces	4-1		
4.2.1 Wind Forces	4-1		
4.2.2 General Structural Integrity Forces	4-6		
4.2.3 Seismic Forces	4-6		
4.2.4 Soil Lateral Forces	4-11		
4.2.5 Flood and Tsunami Forces	4-12		
4.3 Transfer Forces	4-13		
4.4 Anchorage and Connection Forces	4-14		
4.4.1 Overview	4-14		
4.4.2 Wind Forces	4-14		
4.4.3 Seismic Forces	4-15		
4.5 Column Bracing Forces	4-16		
4.6 Out-of-plane Forces	4-17		
4.7 Collector Design Forces	4-17		
4.7.1 Overview	4-17		
4.7.2 Collector Design Forces for Buildings Assigned to SDC C through F	4-17		
Chapter 5			
<b>Load Combinations</b>	<b>5-1</b>		
5.1 Overview	5-1		
5.2 Strength Design Load Combinations	5-1		
5.3 Seismic Load Combinations for SDC B	5-3		
5.4 Seismic Load Combinations for SDC C	5-3		
5.5 Seismic Load Combinations for SDC D, E, and F	5-4		
Chapter 6			
<b>Diaphragm Modeling and Analysis</b>	<b>6-1</b>		
6.1 Overview	6-1		
6.2 In-plane Stiffness Modeling	6-1		
6.3 Analysis Methods	6-2		
6.3.1 Overview	6-2		
6.3.2 Load Paths for Lateral Forces	6-2		
6.3.3 Horizontal Distribution of Lateral Forces	6-3		
6.3.4 ACI 318 Analysis Methods	6-7		
6.4 Beam Models	6-8		
6.4.1 Overview	6-8		
6.4.2 Equivalent Beam Model with Rigid Supports	6-8		
6.4.3 Corrected Equivalent Beam Model with Spring Supports	6-11		
6.5 Strut-and-Tie Models	6-15		
6.6 Finite Element Models	6-15		
6.7 Alternative Models	6-16		
Chapter 7			
<b>Design Strength</b>	<b>7-1</b>		
7.1 Overview	7-1		
7.2 Strength Reduction Factors	7-1		
7.3 Nominal Strength	7-2		

7.3.1 Overview	7-2
7.3.2 Moment and Axial Forces	7-2
7.3.3 Shear	7-2
7.3.4 Shear Transfer	7-3
7.3.5 Collectors	7-3

## Chapter 8

### **Determining and Detailing the Required Reinforcement** 8-1

8.1 Overview	8-1
8.2 Diaphragm Reinforcement Limits	8-1
8.3 Reinforcement Detailing Requirements	8-1
8.4 Chord Reinforcement	8-2
8.4.1 Required Area of Chord Reinforcement	8-2
8.4.2 Location of Chord Reinforcement	8-2
8.4.3 Compression Chords	8-3
8.5 Diaphragm Shear Reinforcement	8-4
8.6 Shear Transfer Reinforcement	8-5
8.6.1 Overview	8-5
8.6.2 Shear Transfer in a Diaphragm	8-5
8.6.3 Required Shear Transfer Reinforcement Between the Diaphragm and the Vertical Elements of the LFRS – Construction Method A	8-6
8.6.4 Required Shear Transfer Reinforcement Between the Diaphragm and the Vertical Elements of the LFRS – Construction Method B	8-9
8.6.5 Required Shear Transfer Reinforcement Between the Diaphragm and the Collector Elements	8-10
8.7 Required Reinforcement Due to Eccentricity of Collector Forces	8-11
8.8 Anchorage Reinforcement	8-11
8.8.1 Overview	8-11
8.8.2 General Structural Integrity Forces	8-11
8.8.3 Wind Forces	8-12
8.8.4 Seismic Forces	8-12
8.9 Collector Reinforcement	8-13
8.9.1 Overview	8-13
8.9.2 Slabs	8-13
8.9.3 Beams	8-15
8.9.4 Subdiaphragms	8-17
8.10 Summary of Design and Detailing Requirements	8-17

## Chapter 9

### **Design Procedure** 9-1

9.1 Overview	9-1
9.2 Step 1 – Select the Materials	9-1
9.3 Step 2 – Determine the Diaphragm Thickness	9-1

9.4 Step 3 – Determine the Diaphragm Design Forces	9-1
9.5 Step 4 – Determine the Classification of the Diaphragm, Select the Diaphragm Model, and Determine the Diaphragm Internal Forces	9-2
9.6 Step 5 – Determine the Combined Load Effects	9-2
9.7 Step 6 – Determine the Chord Reinforcement	9-2
9.8 Step 7 – Determine the Diaphragm Shear Reinforcement	9-2
9.9 Step 8 – Determine the Shear Transfer Reinforcement	9-2
9.10 Step 9 – Determine the Reinforcement Due to Eccentricity of Collector Forces	9-2
9.11 Step 10 – Determine the Anchorage and Connection Reinforcement	9-2
9.12 Step 11 – Determine the Collector Reinforcement	9-3

## Chapter 10

### **Examples** 10-1

10.1 Overview	10-1
10.2 Examples 10.1 – One-story Retail Building (SDC A)	10-1
10.3 Example 10.2 – Seven-story Office Building (SDC B)	10-16
10.4 Example 10.3 – Eighteen-story Residential Building (SDC C)	10-38
10.5 Example 10.4 – Thirty-story Office Building (SDC D)	10-63
10.6 Example 10.5 – Five-story Residential Building (SDC D)	10-85

## Chapter 11

### **References** 11-1

### **Notations** N-1
