

CONTENTS

Foreword.....	i
Preface	iii
Dedication and Acknowledgement.....	iv
Chapter 1 – Early Reinforced Concrete	
1.1 Introduction	1-1
1.2 Concrete.....	1-1
1.3 Steel	1-6
1.4 References	1-7
Chapter 2 – Early Steel Reinforcing Bars	
2.1 Specifications and Standards.....	2-1
2.1.1 ASTM Specifications	2-1
2.1.2 Manufacturer’s Standard Specification.....	2-2
2.1.3 SPR26 Requirements.....	2-2
2.1.4 References	2-7
2.2 Reinforcing Bar Sizes.....	2-8
2.3 Reinforcing Bar Types	2-9
2.3.1 American Deformed Bars.....	2-9
2.3.2 Bonna Bars.....	2-10
2.3.3 Columbian Bars	2-11
2.3.4 Corrugated Bars	2-15
2.3.5 De Man Crimped Bars.....	2-19
2.3.6 De Man Undulated Bars.....	2-20
2.3.7 Diamond Bars	2-21
2.3.8 Elcannes Bars	2-22
2.3.9 Golding Monolith Bars.....	2-23
2.3.10 Havemeyer Bars	2-25
2.3.11 Herbst Bars.....	2-28
2.3.12 Herringbone Bars.....	2-29
2.3.13 Hyatt Bars.....	2-30
2.3.14 Inland Bars	2-31
2.3.15 Inland Bond Bars.....	2-32
2.3.16 Jenks Bars	2-33
2.3.17 Kahn Cup Bars.....	2-35
2.3.18 Kahn Trussed Bars	2-36
2.3.19 Klett Bars	2-42
2.3.20 Lug Bars.....	2-43
2.3.21 Maxwell Trussed Bars	2-45
2.3.22 Monotype Bars	2-46

2.3.23 Ovoid Bars.....	2-48
2.3.24 Pittsburgh Standard Reinforcing Bars	2-48
2.3.25 Pohlmann Bars.....	2-50
2.3.26 Priddle Bars.....	2-51
2.3.27 Ransome Bars	2-52
2.3.28 Rib Bars.....	2-54
2.3.29 Rivet Grip-Bars	2-56
2.3.30 Round Rib Bars.....	2-57
2.3.31 Scofield Bars.....	2-58
2.3.32 Slant Rib Bars.....	2-59
2.3.33 Slick Bars	2-60
2.3.34 Spiral Bars	2-63
2.3.35 Square Rib Bars.....	2-63
2.3.36 Staff Indented Bars.....	2-64
2.3.37 Thacher Bulb Bars	2-65
2.3.38 Thacher Riveted Bars.....	2-66
2.3.39 Thacher Undulated Bars	2-67
2.3.40 Trus-Con Bars.....	2-69
2.3.41 U Bars.....	2-70
2.3.42 Unit Bars.....	2-73
2.3.43 Wing Bars	2-74
2.3.44 Miscellaneous Bars.....	2-75

Chapter 3 – Early Welded Wire Fabric

3.1 Specifications and Standards.....	3-1
3.1.1 ASTM Specifications.....	3-1
3.1.2 References	3-2
3.2 Wire Section Properties.....	3-2
3.3 Welded Wire Fabric Types.....	3-5
3.3.1 Clinton Electrically Welded Wire Fabric	3-5
3.3.2 Lock-Woven Wire Fabric	3-10
3.3.3 Square-Mesh Wire Fabric.....	3-14
3.3.4 Staple-Locked Wire Fabric.....	3-16
3.3.5 Tie-Locked Wire Fabric	3-18
3.3.6 Triangle-Mesh Wire Fabric	3-19
3.3.7 Wisco Reinforcing Mesh	3-27

Chapter 4 – Early Systems of Reinforcement

4.1 Introduction	4-1
4.1.1 General.....	4-1
4.1.2 European Systems Circa 1900	4-2
4.1.3 System Descriptions	4-4
4.2 Reinforcing Bar Gage Systems – United States.....	4-5
4.2.1 Introduction	4-5
4.2.2 Beams, One-Way Slabs, Two-Way Slabs Framing into Beams or Girders, and Stirrup Reinforcement Systems.....	4-7

4.2.2.1 Brayton System.....	4-7
4.2.2.2 Columbian Floor Construction System.....	4-8
4.2.2.3 Wire and Expanded Metal Construction System	4-8
4.2.2.4 Unit System	4-12
4.2.2.5 Pin-Connected Girder Frame System.....	4-12
4.2.2.6 Cummings Bar System	4-13
4.2.2.7 Corr System.....	4-16
4.2.2.8 Xpantruss System.....	4-16
4.2.2.9 American System of Reinforcing for Concrete Construction.....	4-17
4.2.2.10 Kahn System	4-18
4.2.2.11 Hennebique System	4-20
4.2.2.12 Johnson (Corrugated) Bar System	4-21
4.2.2.13 Universal Reinforcement System.....	4-24
4.2.2.14 Faber System of Tile and Concrete Construction	4-25
4.2.2.15 Gabriel System of Reinforced Concrete Construction	4-25
4.2.2.16 Merrick System.....	4-26
4.2.2.17 Ransome Construction System	4-27
4.2.2.18 Monier Construction System.....	4-31
4.2.2.19 International Floor Construction System	4-32
4.2.2.20 Visintini System.....	4-32
4.2.2.21 Modified De Valliere Construction System.....	4-33
4.2.2.22 American System.....	4-34
4.2.3 Column Reinforcement	4-34
4.2.3.1 Column Encased and Filled Systems	4-34
4.2.3.2 Reinforced Concrete Columns – General	4-35
4.2.3.3 F. P. Smith Wire and Iron Works System	4-35
4.2.3.4 Hennebique Column Reinforcement System.....	4-36
4.2.3.5 Cummings Hooped Column System	4-36
4.2.3.6 Trussed Concrete Steel Company.....	4-36
4.2.3.7 Kahn Columns System	4-37
4.2.3.8 Hinchman-Renton Fireproofing Company System	4-37
4.2.3.9 American Steel and Wire Company System	4-38
4.2.3.10 Unit Concrete Steel Company System	4-38
4.2.3.11 American System of Reinforcing for Concrete Construction.....	4-38
4.2.3.12 Monolith Steel Company System	4-39
4.3 Reinforced Concrete Floor Slab Systems – United States.....	4-39
4.3.1 Introduction	4-39
4.3.2 Four-Way Systems	4-41
4.3.2.1 Turner Mushroom System	4-42
4.3.2.2 Cantilever Flat Slab System	4-43
4.3.2.3 Simplex System	4-43
4.3.2.4 Barton “Spider Web” System	4-44
4.3.2.5 Watson System.....	4-46

4.3.3 Three-Way Systems.....	4-46
4.3.3.1 Morrow Three-Way System.....	4-46
4.3.4 Circumferential Systems	4-47
4.3.4.1 S-M-I System or Smulski System	4-47
4.3.5 Two-Way Systems	4-50
4.3.5.1 Akme System	4-50
4.3.5.2 Corr-Plate System.....	4-52
4.3.6 Hybrid Systems	4-52
4.3.6.1 Two-Way Tile and Concrete System	4-52
4.3.6.2 Floredome Construction System.....	4-54
4.4 Reinforced Concrete Bridge Systems – United States.....	4-54
4.4.1 General.....	4-54
4.4.1.1 Patented Arch Bridges	4-56
4.4.2 Bridge Systems	4-58
4.4.2.1 United States Construction Practice	4-58
4.4.2.2 Melan Construction System	4-58
4.4.2.3 Thacher Construction System	4-59
4.4.2.4 Luten Construction System	4-60
4.4.2.5 Corrugated Bar Construction System	4-62
4.4.3 Summary	4-63
4.5 References	4-63

Chapter 5 – Early Design of Reinforced Concrete

5.1 ACI Building Code.....	5-1
5.2 Working Stresses for Design	5-3
5.3 Bond and Anchorage Requirements	5-4
5.3.1 Introduction	5-4
5.3.2 Bond	5-6
5.3.3 Development Length.....	5-8
5.3.4 Code Requirements on Bond Stress	5-8
5.3.5 Standard Hooks.....	5-11
5.3.6 Lap Splices	5-12
5.4 References	5-12

Chapter 6 – Bibliography..... 6-1

Appendices

A. ASTM Specification A15-11	A-1
B. Manufacturer’s Standard Specifications, 1914.....	B-1
C. Simplified Practice Recommendations SPR 26-24	C-1
D. Smithsonian Reinforcing Bar Exhibit	D-1
E. Early Reinforcing Bar Patents	E-1
F. Miscellaneous Advertisements	F-1
G. Descriptions of Foreign Reinforcing Bar Systems.....	G-1

Index	I-1
