

Advantages of Membership

Benefit from CRSI's marketing power.

CRSI has built a network of Region Managers throughout the United States whose primary purpose is promoting the use of reinforced concrete.

CRSI Region Managers serve as a resource to the design and construction communities by conducting presentations and workshops aimed at Architect/Engineering firms, state DOTs, and other specifiers. They conduct ongoing market research within the region and present to professional groups such as ACI Chapters, state structural engineers associations, and local AIA Chapters, as well to engineering, construction management, and architectural schools.

Participate in CRSI's technical committees.

We are an ANSI-Accredited Standards Developer that produces documents impacting your business.

As a member of CRSI, you can join any of our Committees and have the opportunity for your voice to be heard. Our members help to develop industry standards and provide input on industry and association issues. As an approved Standards Development Organization (SDO), CRSI develops and maintains consensus standards for design, detailing, fabrication, placement, and construction of assemblies consisting of steel reinforcement and associated products used in concrete and masonry construction.

Get priority access to CRSI's technical experts.

Our engineering professionals are here to help you.

CRSI members have priority access to our team of experienced engineering professionals. Our experts offer day-to-day technical assistance to members as well as to architects, engineers, and construction professionals, by offering technical publications, design aids, software, and educational seminars.

Network with current and potential customers.

CRSI's conferences, seminars, educational programs, and social events provide opportunities to build relationships nationally and locally.

All CRSI members have the opportunity to participate in the Institute at the National, Regional, and Local levels. The five regions across the US and Canada, along with smaller local chapters in some regions, allow companies and individuals to benefit from a network of members within their own geographical area. CRSI also holds two National meetings each year.

Additional benefits available to members include discounts on publications and software, access to the Members Only area of our website, and industry and market reports.

Join TODAY by filling out the enclosed application and experience all the benefits CRSI has to offer!

Fabricator-Specific Membership Benefits

Detailer Training Program

For CRSI Fabricator Members only! CRSI's online course teaches learners about key people, project requirements and deliverables, provides an introduction to industry terminology and standards, and prepares trainees for a successful detailing career. CRSI's Detailer Training Program is designed to train and retain efficient reinforcing steel detailers in Members' fabrication shops.

Get an immediate ROI on your CRSI Membership with this one-of-a-kind Detailer Training Program. This is an exclusive offer available only for CRSI Fabricator members and is absolutely FREE.

Market Dashboard

The CRSI Market Dashboard presents valuable market intelligence; information only available to CRSI members. This industry-specific dashboard presents historical data for various geographic markets and building use categories. Additionally, downloadable tabulated data is available at state, regional and national levels. This information lists both the steel reinforcing bar consumption and total construction spending, in twenty building use categories, for the prior seven years.

In the Market Forecast section, data is presented for the total US construction market, and each of the five CRSI regions. This information identifies the total consumption of steel reinforcing bars over the preceding five years, as well as, projections for the current year and five years into the future.

Safety Program

Safety in the workplace, especially in a rebar fabrication shop, should be everyone's top priority. By being a member you can take advantage of our Safety Seminars where we discuss how to help our teams be safe and successful, review OSHA compliance specific to the rebar industry, recognize common hazards and ideas to control them, and promote a challenge to member and non-member shops on why we should work together to improve safety.

CRSI Procurement Support Services (Concord)

CRSI Members source smarter. Save as much as 50% within key expense areas, including business services, employee incentives and facilities management! No fees, no commitments, no hassle. See back page of packet for more details.
