Concrete Reinforcing Steel Institute Announces New Steel Reinforcing Bar Fabrication Standard

(SCHAUMBURG, ILLINOIS — August 25, 2026) The Concrete Reinforcing Steel Institute (CRSI) has released a new standard, *Bend Diameters, Measuring Points and Fabrication Tolerances for Steel Reinforcing Bars*. This mandatory-language standard covers the fabrication requirements for steel reinforcing bars used as reinforcement in concrete structures.

The American National Standards Institute (ANSI) accredited the Concrete Reinforcing Steel Institute (CRSI) as a Standards Development Organization (SDO) in April 2013. The scope of CRSI's standards activities includes the development and maintenance of consensus standards for design, detailing, fabrication, placement, and construction of assemblies consisting of steel reinforcement and associated products used in concrete and masonry construction. CRSI currently has five standards.

About the Concrete Reinforcing Steel Institute

Founded in 1924, the Concrete Reinforcing Steel Institute (CRSI) is a technical institute and Standards Developing Organization (SDO) that stands as the authoritative resource for information related to steel reinforced concrete construction.

Serving the needs of engineers, architects and construction professionals, CRSI offers many industry-trusted technical publications, standards documents, design aids, reference materials and educational opportunities. CRSI Members include manufacturers, fabricators, material suppliers and placers of steel reinforcing bars and related products as well as professionals who are involved in the research, design, and construction of steel reinforced concrete. CRSI also has a broad Region

Manager network that supports both members and industry professionals. Serving the construction market in the United States, Canada, and Mexico, CRSI is headquartered in Schaumburg, Ill. with regional offices located across the United States.
