Epoxy Interest Group of the Concrete Reinforcing Steel Institute Announces Wes Miller as Director

(SCHAUMBURG, IL–May 3, 2017) The Epoxy Interest Group is pleased to announce Wes Miller has accepted the position of Managing Director. Mr. Miller will be responsible for all operations of the Epoxy Interest Group of CRSI, promoting the interests and advantages of epoxy-coated reinforcing steel to the user community, especially Departments of Transportation, developing and implementing strategy relating to market development of epoxy-coated reinforcing steel including representation on national technical committees such as CRSI, ACI, and ASTM, development of print and digital publications including newsletters and advertising materials, websites, and representation at trade shows.

During his career, Wes has successfully developed new business and promoted various specialty steel products through the domestic and global markets. He has also holds a patent, written a technical specification document, and has been invited to be a subject matter expert and guest speaker on numerous occasions.

Professional experience includes positions as Division Manager, Global Sales Manager and General Manager within industry companies.

Wes holds a B.S. in Marketing from the Pennsylvania State University, and an MBA from the University of Pittsburgh Katz School of Business.

About the Concrete Reinforcing Steel Institute

Founded in 1924, the Concrete Reinforcing Steel Institute (CRSI) is a technical institute and Standards Developing Organization (SDO) that stands as the authoritative resource for steel reinforced concrete construction. Among the Nation's oldest trade associations, CRSI offers many industry-trusted technical publications, standards documents, design aids, reference materials and educational opportunities.

CRSI's members represent over 80% of the U.S. manufacturers, fabricators and placers of steel reinforcing bar and related products with over 600 locations in 49 states, and with over 15,000 employees. Members produce, fabricate and install approximately 9 million ton of reinforcing steel per year using scrap steel in efficient manufacturing operations. It is estimated that the industry impacts over 75,000 people in steel transportation and placement in North America.

The CRSI membership also includes professionals across the country who are involved in the research, design, and construction of steel reinforced concrete. CRSI staff comprises a nationwide region network of industry professionals.
